

TACKBOARD PANELS

Tackboards are a versatile sound transmission inhibitor with tackability. They feature an industrial insulation board core for stability, strength and excellent tackability. When laminated with vinyl, Tackboards provide a low-maintenance, mold- and mildew-resistant surface, which is easy-to-clean. Or Tackboards may also be fabric covered for enhanced noise inhibition, while providing a resilient surface that heals quickly from pinholes and repeated bulletin board use by posting of displays or messages. Choose from a variety of sizes, colors and trims to fit your classroom, office, lobby or conference room.

Composition:

Industrial insulation board or mineral fiberboard

Finish:

Type I or Type II (Class A) fabric backed vinyls. For tackability a large variety of fabrics are available. See the “Finishes” page on Lamvin.com for a direct link to our recommended suppliers’ catalogs which include detailed images of an array of designs. Custom fabrics and printed fabrics are also options. All finishes shall be reviewed for panel stability.

Size: Custom Shapes and sizes up to 4' x 12' . Thickness 1/2”

Fire Test: All components are ASTM E84 – Class 1/A or Class 3/C

EDGE DETAIL OPTIONS

Square

Wrapped around all sides or vertical only
